## Professional Summary

Results-driven Computer Science undergraduate (**CGPA: 8.72**) with strong expertise in Full-Stack software engineering, cross-platform mobile development (**Flutter/Dart**), and **Generative AI** systems. Proven track record of architecting and deploying production-grade applications, including an AI recruitment copilot with real-time ATS scoring and predictive healthcare analytics. Experienced in building low-latency RESTful APIs, real-time Cloud Firestore architectures, and automated financial data pipelines.

## Education

### SRM University, Delhi-NCR

Bachelor of Technology in Computer Science – **CGPA: 8.72 / 10.0**

Aug 2023 – June 2027

Sonepat, Haryana

### Delhi Public School, Rewari

Higher Secondary Education (CBSE) – **Class 12: 82.8%** | **Class 10: 97.6%**

2013 – 2023

Rewari, Haryana

## Relevant Coursework

- Core Computer Science:** Data Structures & Algorithms, Operating Systems, Database Management Systems (DBMS), Computer Networks, Computer Architecture
- Applied & AI Systems:** Artificial Intelligence, Machine Learning Integration, Full-Stack Web Development, Mobile Application Development

## Experience

### Bluestock Fintech

Data Science Intern

May 2026 – July 2026

Remote

- Analyzed large-scale financial and equity datasets using Python (Pandas, NumPy) to extract quantitative market trends for investment research.
- Engineered automated data validation and ETL pipelines, cutting analytical preparation time and data ingestion latency by 25%.
- Built interactive business intelligence dashboards using Matplotlib and Seaborn to communicate risk metrics to cross-functional teams.
- Formulated optimized SQL queries on relational databases, maintaining data integrity and accelerating report generation workflows.

## Projects

### iJob AI – AI Recruitment Platform & Career Copilot | Flutter, Dart, Google Gemini AI, Firebase

2025

- Architected and deployed a cross-platform job marketplace (Web & Mobile) with a responsive glassmorphic UI and real-time Cloud Firestore sync.
- Integrated **Google Gemini Generative AI** to build real-time **ATS Resume Match Scoring** (keyword match, percentage fit), automated cover letters, and STAR interview simulation.
- Engineered an interactive **AI Career Coach** with low-latency caching for tech roadmaps, recruiter JD generator, and candidate tracking.

### MediAssist AI – Healthcare Platform | React.js, TypeScript, Node.js, PostgreSQL

2026

- Developed a full-stack healthcare web app using React, TypeScript, and Node.js for AI symptom analysis and doctor consultation booking.
- Integrated machine learning inference models via RESTful backend APIs to deliver real-time disease risk prediction and preventive health insights.
- Designed robust RESTful APIs with JWT authentication, role-based access control, and normalized PostgreSQL schemas for sub-second queries.

## Technical Skills

- Languages:** C++, Python, Dart, TypeScript, JavaScript, SQL, Java, C, HTML5/CSS3
- Frameworks & Libraries:** Flutter, React.js, Node.js, Express.js, Prisma ORM, Streamlit, Pandas, NumPy
- Cloud & Backend Services:** Firebase (Auth, Firestore, Hosting, Storage), RESTful APIs, Microservices, JSON Serialization
- AI & Machine Learning:** Google Gemini AI API, Prompt Engineering, Predictive Analytics, ML Model Integration
- Databases:** PostgreSQL, Cloud Firestore, MySQL, SQLite, Database Normalization
- Developer Tools:** Git, GitHub, VS Code, Android Studio, Xcode, Firebase CLI, Postman, Vite, Vercel

## Certifications

- Python Module Certification** – Microsoft **Oct 2024**
- Object-Oriented Programming in C++** – Udemy **Mar 2024**
- Digital Skills: Artificial Intelligence** – Accenture **2024**
- Japanese-Language Proficiency Test (JLPT N5)** – JLPT, Japan **Aug 2022**
