Summary

Computer Science undergraduate with experience building full-stack, mobile, AI-powered, and data-driven applications. Proficient in C++, Python, JavaScript/TypeScript, Flutter, React, Node.js, and SQL. Experienced in developing scalable software through industry internship and personal projects. Passionate about building reliable software systems and solving complex engineering problems in collaborative environments.

Education

SRM University, Delhi-NCR

Bachelor of Technology in Computer Science

Aug 2023 – June 2027

Sonepat, Haryana

- **CGPA:** 8.72 (6 semesters)

Delhi Public School, Rewari

Higher Secondary Education (CBSE)

2013 – 2023

Rewari, Haryana

- **Class 10:** 97.6% **Class 12:** 82.8%

Relevant Coursework

Data Structures | Algorithms | Operating Systems | DBMS | Computer Networks | Computer Architecture | Artificial Intelligence | Web Development | App Development

Experience

Data Science Intern

Bluestock Fintech

May 2026 – July 2026

Remote

- Developed a Financial Intelligence Dashboard for 92 Nifty 100 companies using Python, Streamlit, SQLite, Pandas, and Plotly.
- Designed and implemented 8 modular dashboard components including Company Profile, Stock Screener, Peer Comparison, Trend Analysis, Sector Analysis, Capital Allocation, Annual Reports, and Valuation Analysis.
- Designed SQL-based ETL pipelines to clean, transform, and integrate financial datasets for efficient querying and analytics.
- Implemented financial metrics including ROE, OPM, Debt-to-Equity, CAGR, and valuation screening with interactive data visualizations.
- Improved application performance through modular architecture, cached database queries, and reusable analytics components.

Projects

iJob – Job Finder Application 📱 | Flutter, Dart, Firebase

2025

- Built a cross-platform Flutter application enabling users to browse, search, and apply for jobs through a unified Android and iOS codebase.
- Integrated Firebase Authentication and Cloud Firestore to provide secure user authentication, real-time synchronization, and persistent user sessions.
- Designed reusable Flutter widgets and state management to improve code maintainability and user experience.

MediAssist AI – Healthcare Platform 📱 | React.js, TypeScript, Node.js, PostgreSQL

2026

- Developed a full-stack healthcare platform using React, Node.js, and PostgreSQL that integrates AI-powered symptom analysis and doctor discovery.
- Integrated machine learning models through backend APIs to deliver real-time disease prediction and personalized health recommendations.
- Designed RESTful APIs and integrated frontend and backend components to enable secure and scalable communication between services.

Technical Skills

Languages: C++, Python, Java, TypeScript, JavaScript, SQL, C, HTML/CSS

Frameworks: React.js, Node.js, Express.js, Flutter, Firebase, Prisma

Databases: PostgreSQL, MySQL, SQLite, Firestore

Libraries: Pandas, NumPy, Plotly, Streamlit, Tkinter

Developer Tools: Git, GitHub, VS Code, Android Studio, Xcode, Jupyter Notebook, Google Colab, Vite

Certifications

Python Module Certification – Microsoft

Oct 2024

Object-Oriented Programming in C++ – Udemy

Mar 2024

Digital Skills: Artificial Intelligence – Accenture

2024

Japanese-Language Proficiency Test (JLPT N5) – JLPT, Japan

Aug 2022
